Summary

Full Stack Developer experienced in building scalable applications and RESTful APIs using modern technologies. Skilled in API integration, secure authentication (JWT, RBAC), and modular system design. Experienced in AI-driven solutions using LLMs, LangGraph, and OCR-based document processing. Strong in performance optimization and delivering production-ready applications.

Experience

Dynamatix Analytics Pvt Ltd (Dynamatix Services) (Full Time)

Full Stack / Backend Developer | Sept 2024 - Present

1. Backend Development & API Engineering

- Designed and developed scalable REST APIs using Flask for AI-driven applications including mortgage assistant, document intelligence, and conversational systems
- Built OpenAPI-driven integration layer to dynamically execute external APIs using natural language inputs, improving system flexibility and reducing manual API wiring
- Implemented secure authentication and authorization using JWT, API keys, and MongoDB-based RBAC, ensuring fine-grained access control across services
- Developed modular API architecture using Flask Blueprints and Clean Architecture principles, improving maintainability and scalability

2. AI / LLM Integration

- Engineered AI-powered conversational workflows using LangGraph and LangChain, enabling intelligent routing of user queries across multiple domain-specific subgraphs
- Built natural language → API execution pipelines, supporting intent detection, parameter resolution, and confirmation flows
- Integrated LLM-based document intelligence system for Q&A, summarization, and insights extraction from uploaded documents

3. Document AI & Data Processing

- Developed OCR and document processing pipelines using PaddleOCR and PyMuPDF for extracting structured data from PDFs
- Optimized document processing performance by implementing hybrid extraction strategies, reducing latency for text-heavy documents
- Integrated Azure Blob Storage for scalable document storage and retrieval

4. System Design & State Management

- Implemented Clean Architecture (Domain, Application, Infrastructure layers) for clear separation of concerns
- Designed stateful conversational systems with MongoDB-backed session management, chat history, and memory feedback loops
- Built multi-agent workflows with LangGraph subgraphs handling complex business logic like affordability, income analysis, and recommendations

5. Performance & Optimization

- Improved system performance by introducing lazy loading and background initialization for OCR services
- Enhanced API responsiveness through optimized extraction logic and asynchronous processing strategies
- Added resilient API handling using retry mechanisms and structured error handling

6. **Monitoring, Testing & DevOps**

- Integrated Prometheus metrics, health checks, and readiness endpoints for production monitoring
- Achieved 80%+ test coverage using pytest and pytest-cov, ensuring code reliability
- Containerized applications using Docker and configured Gunicorn for production deployment
- Enforced code quality using Black, Ruff, and mypy

7. **Additional Contributions**

- Analyzed millions of API logs to identify high-priority workflows, improving AI response accuracy and system efficiency
- Improved RBAC security logic by fixing path-matching issues, reducing authorization errors
- Maintained API documentation and Postman collections for seamless frontend/backend integration

8. **Key Strengths (Add as Summary Section)**

- AI + Backend Integration (LangGraph, LangChain, LLM workflows)
- Scalable API Design (Flask, OpenAPI, Clean Architecture)
- Document Intelligence (OCR + AI pipelines)
- Secure Systems (JWT, RBAC, API Security)
- Performance Optimization & Production Readiness

Dynamatix Analytics Pvt Ltd (RiskHawk) (Intern)

Junior Java Developer (Backend) | Jan 2022 – Sept 2024

- Developed and maintained backend services and APIs using Java.
- Collaborated with cross-functional teams to design and implement new features.
- Optimized application performance and scalability through code reviews and refactoring.
- Assisted in database design, management, and optimization. Conducted testing and debugging to ensure high-quality code and application functionality.

Education

NALLA MALLA REDDY ENGINEERING COLLEGE (CSE-AIML)

Skills & Abilities

- Accounting & Budgeting
- Proficient with POS systems
- Excellent interpersonal and communication skills
- Poised under pressure
- Experienced in most restaurant positions
- Fun and energetic

Activities and Interests

Theater, environmental conservation, art, hiking, skiing, travel
